REYNOLDS COUNTY

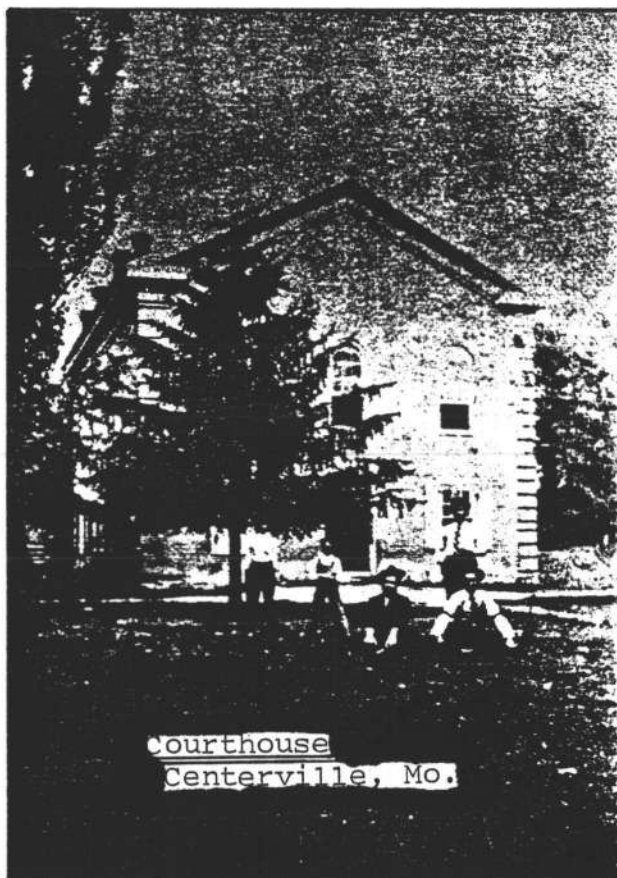

In 1845 when Reynolds County was organized, Lesterville was designated as the first county seat. Courts met in the home of Joseph McNails until a small, log courthouse was built in 1846-47. Fire destroyed this structure and all county records in 1862.

For the next three years courts met in private homes until the county seat moved to Centerville. The court authorized construction of another small building of logs or rough lumber for court purposes in 1865, but it too burned on November 24th or 25th, 1871. The following day the court met in the courtyard by the ruins and appropriated \$10,000 for a new building.

The third and present courthouse, a two-story brick building, originally measuring 50 by 40 feet, reportedly cost \$8,000, less than the \$10,000 the court had appropriated in 1871. The original specifications, which are on file at the courthouse, called for a dome and lantern, but these apparently were never built.

In the 1930s when Work Projects Administration projects helped counties in building new courthouses, it was out of the question for Reynolds since there were insufficient funds to sponsor the county share. Instead, the court bought for \$600 a two-story, 24-by-40-foot frame building and moved it to the southwest corner of the square.

The 1871 courthouse continues in use, a typical example of a courthouse design found in Missouri during the 19th century. The Reynolds County courthouse is one of the few in Missouri over 100 years old.

Courthouse
Centerville, Mo.

Reynolds County Courthouse, 1871.

County	Reynolds	
Organized	Feb. 25, 1845	
Named After ...	Gov. Thomas Reynolds	
County Seat ...	Centerville

FORWARD

In 1876 the state of Missouri made a county by county Agricultural Census. The tabulation was made of the white and colored population by sex and age groups. The deaf, dumb, blind and insane were listed separately by sex and color with the duration of their ailment recorded. Livestock was tabulated by number of horses, mules, jacks, jennetts, cattle, sheep and hogs. Products was tabulated by the number of bushels of wheat, corn, oats, barley and rye. By the number of pounds of tobacco, wool, and sugar. By the tons of hay, and hemp. By the gallons of whiskey, wine and molasses.

I wish to express my sincere thanks to the employees of the Reynolds County, Missouri Courthouse (1983/84) who so graciously permitted me to copy this document. A portion of the Census is missing as is shown by the shaded area on the map of Reynolds County on the following page. This missing portion was contained in a second book that has not been located.

The columnar headings used in this transcription are the same as was used on the original census with the following exceptions. (1) Can R/W = Can Read and Write. (2) L = Livestock. (3) P = Produce. The data recorded in the column headed Can R/W is questionable. This transcriber believes that the recorder made an error, intending to put this mark in the column headed Six to Eighteen years. As recorded it appears that children under the age of eighteen were the only inhabitants who could read and write in Reynolds County, Missouri in 1876.

Any data in parenthesis () is data added by the transcriber with the exception of (page #) which depicts the actual page number on the original census. Any data that is underlined () is of a questionable nature to this transcriber.

We have strived to make this transcription as error free as possible. Any corrections will be welcomed and the corrections will be made upon notification of an error.

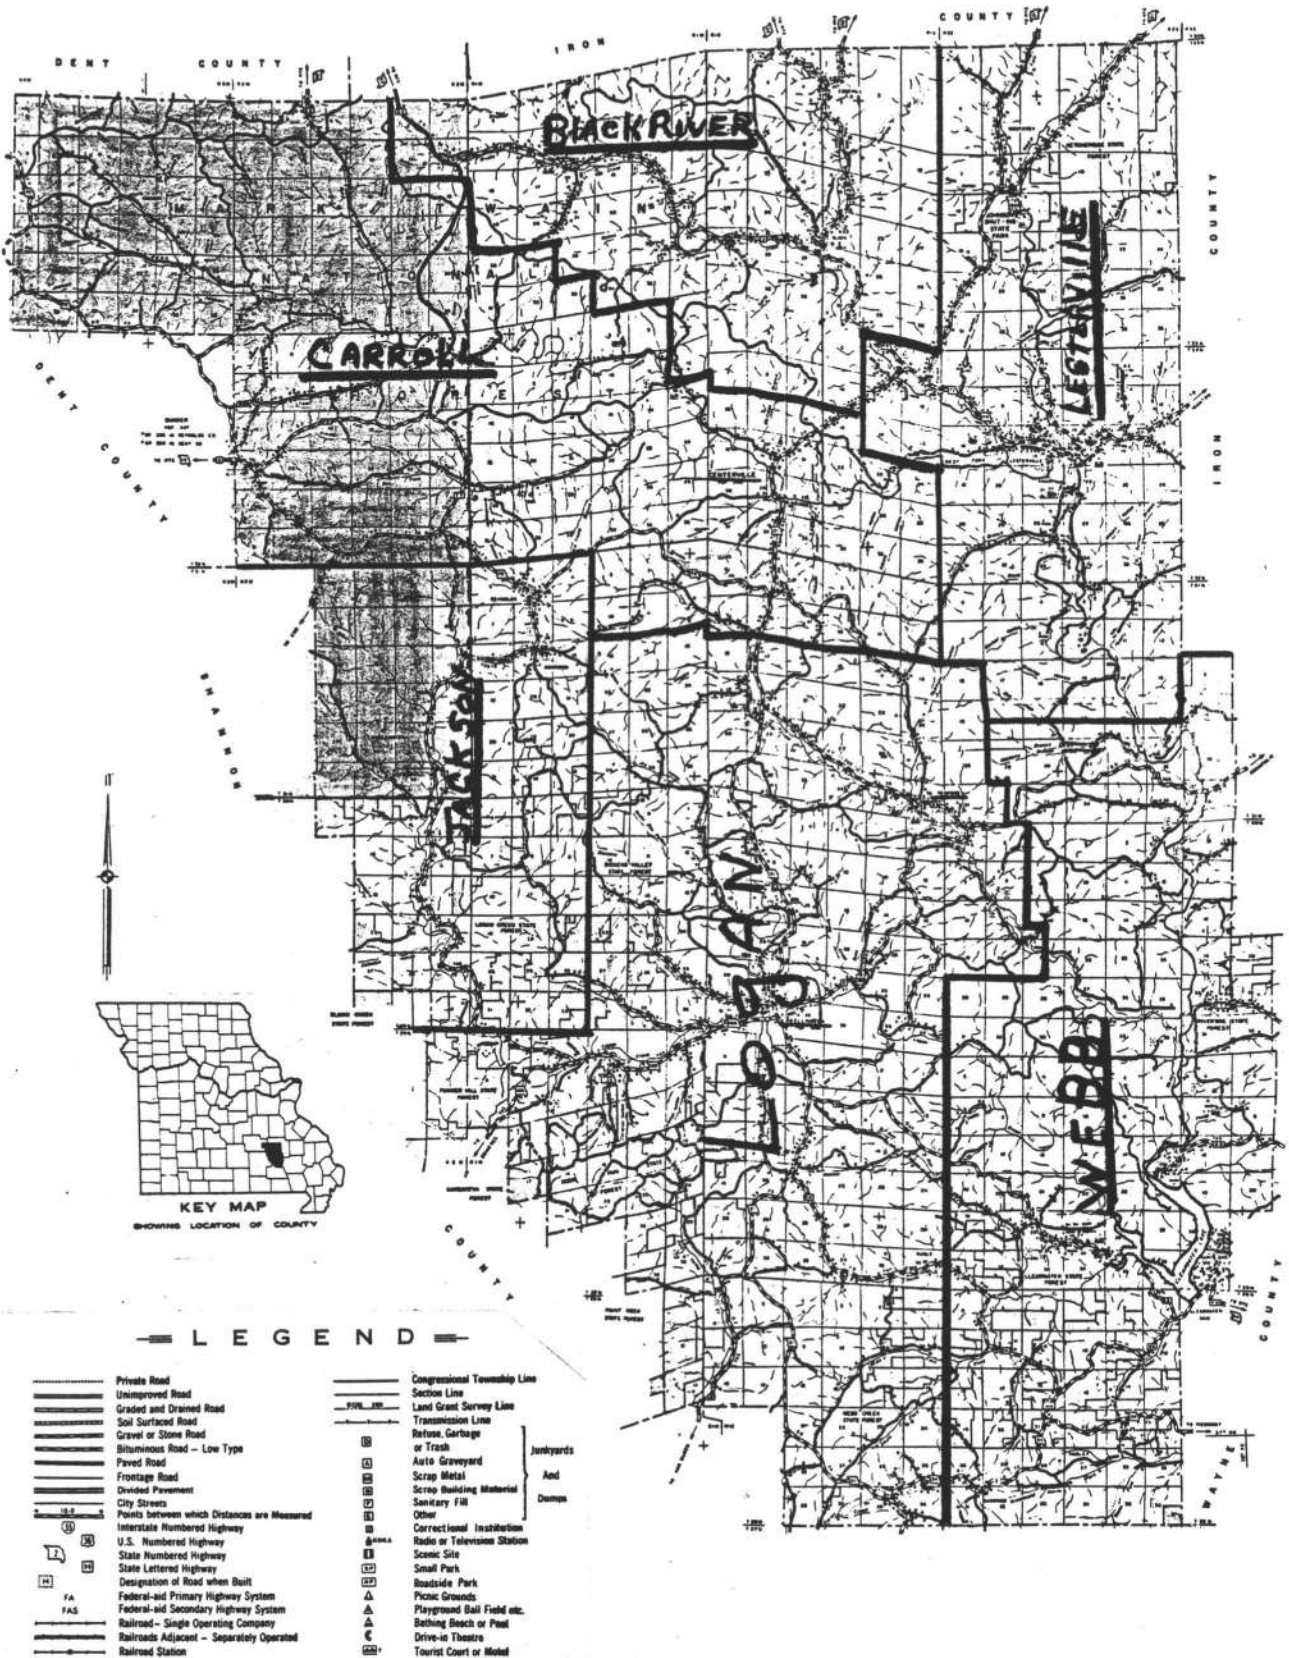

This is our contribution to the many genealogists/researchers and family historians who are tracing their family in Reynolds County, Mo.

I hope that it will assist them and the ones to follow for years to come.

From one who's roots run deep in the soil of Reynolds County, Mo.

Transcribed and Indexed by:
